

Where
learning
is brought
to life.

JA Junior Achievement™
Finance Park®

JA Finance Park is an experiential learning program that partners classroom learning with a simulation experience that opens a world of opportunity for students.

Students get an opportunity to explore careers as well as develop personal finance and money management skills. JA Finance Park prepares students for financial decisions and challenges in their adult lives.

Volunteers mentor students and help them gather information for their personal financial decision-making.

During the JA Finance Park simulation, students apply learned concepts and assume family and income scenarios. They use bank services, experience expenses, and make investment decisions, balance family budgets, all while exploring 21st Century careers.

“JA Finance Park helped my students further explore real life experiences that they will encounter when they are on their own. It made them more aware of how many outside businesses, utilities, and family obligations will want a piece of their paycheck!”

-Janeen, JA Finance Park Teacher

The JA Finance Park curriculum supports Common Core and State Academic Standards for middle and high school students.

Educators and students can participate in this unique learning opportunity at our experiential learning facility in St. Paul, or virtually in your own classroom.

Entry and Advanced program opportunities are available.
