

# Science Technology Engineering Math

Apply **STEM** concepts through experiential learning with **Junior Achievement**

JA BizTown integrates **STEM** concepts into the simulation to help students understand how they will apply these lessons in the “real world.”

JA BizTown provides students in grades 4-6 with a solid foundation of business, economics and free enterprise education. Through daily hands-on activities, and active participation in a simulated community designed to support differentiated learning styles, students develop a strong understanding of the relationship between what they learn in school and their local economy.

## STEM in JA BizTown

### STEM Activities

- Medical Research
- Science Experiments
- Web Page Design
